MELBOURNE CIVIC SOCIETY

Aircraft Noise Survey

Melbourne Civic Society is currently conducting an Aircraft Noise Survey, to identify the location of those people in the communities to the west of East Midlands Airport who are significantly affected by aircraft noise.

We plan to present the information we collect as dots on two maps, one showing the location of people who are affected when aircraft are landing and one showing the location of people who are disturbed when aircraft are taking off.

Our goal is to provide information to East Midlands Airport that will help them plan routes that will cause minimal disruption and discomfort to local residents.

You do not need to tell us your name or e-mail address if you don't want to, but we will need this information if you want us to keep you informed on how our discussions are going with the Airport.

Please return your completed survey to us in one of the following ways:

Take a photograph of your survey and email it to:
